**DETAILED ACTION**

***Response to Arguments***

1. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 14 and 15 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification provides no basis for the rodent being a mouse or the dimensions of the enclosure being of a size related to a mouse.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3644

5. Claims 1, 4 and 6-27 rejected under 35 U.S.C. 102(b) based upon a public use or sale of the invention. Attention is drawn to the Table of Contents: National Conference on Urban Entomology, May 20-22, 2004. Under the subheading "THE MAXFORCE TICK MANAGEMENT SYSTEM AND ITS ROLE IN REDUCING THE INCIDENCE OF LYME DISEASE": it was disclosed that field studies (i.e. the device is placed in locations that are accessible to the general public) were ongoing at Mason's Island, Connecticut from <sup>1999</sup>~~199~~ to 2001. It is further stated that numerous field efficacy trials were conducted in the Northeastern United States in which the boxes were applied per label directions, i.e. that the boxes were placed in both late spring and mid summer. As such, the placement of the boxes in late spring of 1999, provides for a date more than one year prior to filing of the earliest Application in the current chain of applications, i.e. June 19, 2000. It is noted that Gary Maupin and Marc Dolan who are listed as authors of the cited segment are two of the inventors of the current application.

### *Conclusion*

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37

Art Unit: 3644

CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
